EDUCATION

University of California, Berkeley

Bachelors of Science in Electrical Engineering and Computer Sciences

Berkeley, CA

2029

EXPERIENCE

Volunteer Researcher

June 2023 – Present

University of California, San Diego

San Diego, CA

- Developed an open-source package in **Python** for adaptive AI model parameter tuning, raising training efficiency.
- Conducted reproducible experiments using **Python** and **Docker**, validated with a **40-participant** university study to ensure statistical reliability.
- Co-authored a pending paper and co-filed a patent applying dynamic optimization to **machine learning systems**.

App Developer

August 2024 – Present

Persian Cultural Center

San Diego, CA

- Designed and launched a **Swift**-based iOS app used by 300+ members; integrated nonprofit infrastructure via **SwiftData**, **JoinIt**, and **RESTful APIs**.

Course Developer

June 2024 – May 2025

JuiceMind

Remote

- Created AP Computer Science Principles curriculum using **JavaScript** to teach computational problem-solving.
- Produced **30+** quizzes, **24** coding labs, and **4** projects for over **1,000** students in the U.S. and abroad.

Project Intern

January 2024 – May 2024

Leonardo DRS

San Diego, CA

- Engineered a low-latency multiplayer simulation backend using **Python**, **MySQL**, and **Linux**.
- Automated client registration for up to **50** concurrent users via scalable database routines.

PROJECTS

AssistAI | *Next.js, Python, PostgreSQL*

November 2025 – Present

- Built a **Next.js** website which generates full course plans for transfer students, winning the Overall Winner award against **250** hackathon participants at HackCC
- Web-scraped using **BeautifulSoup** to source transfer information. Integrated with the **ChatGPT API** to build an AI transfer counselor.

Bluehax Discord Bot | *Python, MySQL*

August 2025 – Present

- Built a **Discord.py** bot automating *Nintendo 3DS* region swaps, supporting over **1,550** global users.
- Implemented a relational **PostgreSQL** schema for verification and temporarily storing console data.

LEADERSHIP

MesaFSD

May 2025 – Present

- Co-founded and serve as Vice President and Software Lead of San Diego Mesa College's Full Self-Driving Club; lead weekly technical meetings for 20+ active members.
- Secured \$10,000 in funding to design and build a self-driving go-kart from the ground up for competition in the Autonomous Karting Series.
- Led software teams developing GPS waypoint navigation and computer-vision-based perception pipelines powering the kart's autonomous driving stack.

Online Gaming Community

August 2021 – April 2026

- Founded a gaming community of over **175,000** community members across the Discord and Reddit platforms.
- Led a team of **25** volunteer moderators to keep the community safe and run entertaining events.

TECHNICAL SKILLS

Languages: Python, C/C++, Swift, SQL, JavaScript, TypeScript, HTML/CSS

Frameworks: PyTorch, Node.js, Express.js, React, React Native, SwiftUI, SwiftData

Developer Tools: Git, Google Cloud Platform, Vercel, Replit, Google Firebase, Supabase, Xcode, PyCharm, IntelliJ
