EDUCATION

University of California, Berkeley

Berkeley, CA

Bachelor of Science in Electrical Engineering and Computer Sciences

Expected May 2028

- Transfer GPA: 3.94 / 4.00
- Relevant Transfer Coursework: Data Structures, Algorithms, Discrete Mathematics, Computer Organization & Assembly, Linear Algebra, Multivariable Calculus, Electricity & Magnetism

EXPERIENCE

Software Engineering Intern

June 2026 - Present

UniShack

Berkeley, CA

- Shipped dorm matching feature enabling students to search roommates and university dorms and receive live housing application updates.

Electrical Engineering Intern

July 2026 - August 2026

ChipMango

Remote

- Selected for competitive **100**-student semiconductor cohort focused on transistor-level design, digital logic, and ASIC/FPGA verification.

Research Assistant

June 2023 - June 2026

University of California, San Diego - ACES Lab

San Diego, CA

- Built open-source Python package for adaptive hyperparameter tuning in neural networks, cutting per-epoch overhead.
- Designed and executed reproducible Python and Docker experiments validated in a **40**-participant university study.
- Co-authored pending paper and co-filed patent on dynamic optimization techniques for machine learning systems.

App Developer

August 2024 - May 2026

Persian Cultural Center

San Diego, CA

- Launched Swift iOS app used by **300+** members, built with SwiftData, JoinIt, and RESTful APIs.

Course Developer

June 2024 - May 2025

JuiceMind

Remote

- Designed AP Computer Science Principles curriculum using JavaScript for over **1,000** students.
- Produced **30+** quizzes, **24** coding labs, and **4** projects.

Network Intern

January 2024 - May 2024

Leonardo DRS

San Diego, CA

- Cut peer-to-peer networking latency by **30%** on Linux using Python and MySQL.
- Built scalable registration system supporting up to **50** concurrent users.

PROJECTS

AssistAI — Next.js, Python, PostgreSQL

November 2025 - April 2026

- Won Overall Winner at HackCC (**250+** participants) with a full-stack Next.js platform for AI course planning.
- Integrated BeautifulSoup scraping and ChatGPT API for intelligent transfer advising.

Bluehax Discord Bot — Python, PostgreSQL

August 2025 - March 2026

- Built Discord.py bot for Nintendo 3DS console management supporting **1,550+** global users.
- Designed PostgreSQL schema for user verification and data storage.

LEADERSHIP & EXTRACURRICULARS

Vice President & Software Lead

May 2025 - June 2026

MesaFSD Full Self-Driving Club

San Diego, CA

- Co-founded club and led technical meetings for **25+** members.
- Secured \$10,000 in sponsorship funding to build competition self-driving go-kart for the Autonomous Karting Series.
- Led development of GPS navigation and computer vision pipelines.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript, TypeScript, Swift, SQL

Frameworks: PyTorch, React, Node.js, Express.js, SwiftUI, SwiftData

Developer Tools: Git, Docker, Linux, Google Cloud Platform, Vercel, Firebase, Supabase, Xcode
