EDUCATION

University of California, Berkeley

B.S. Electrical Engineering and Computer Sciences

Berkeley, CA

Expected June 2028

- Transfer GPA: **3.94** / **4.00** | Coursework: Data Structures, Algorithms, Discrete Mathematics, Computer Organization, Linear Algebra

EXPERIENCE

Software Engineering Intern

June 2026 – Present

UniShack – Part-time

Remote

- Owned end-to-end delivery of a university dorm discovery feature across **11 campuses**, defining the UI, application architecture, database schema, and **React Native** implementation.
- Worked with Product and the CTO to establish a production-data migration process, unblock release dependencies, and present progress through weekly demos.

Electrical Engineering Intern

July 2026 – Present

ChipMango – Part-time

Remote

- Evaluated digital-design training content for students and enterprise learners by auditing ten units of coursework, correcting errors, and producing feedback documents covering microelectronics, PCB fundamentals, transistors, and computer architecture.

Research Assistant

June 2023 – June 2026

University of California, San Diego – ACES Lab

San Diego, CA

- Co-led experiment design and evaluation for adaptive ML optimization, coordinating studies with a Ph.D. mentor and presenting findings to the principal investigator.
- Reframed experiments and technical arguments after reviewer feedback, contributing to U.S. Patent **US20260010823A1** and a co-authored paper.
- Built an open-source **PyTorch** package that saved **60 seconds** and **5.4 kJ** per tuning change; an **18-person** study enabled users to complete **33 additional epochs** per session.

App Developer

August 2024 – May 2026

Persian Cultural Center

San Diego, CA

- Developed and launched a **Swift** iOS event app for **300+ active users**, increasing registrations by **40%**; added Apple and PayPal payments that generated **\$3,000+** in first-month donations.

Network Intern

January 2024 – May 2024

Leonardo DRS

San Diego, CA

- Reduced peer-to-peer latency by **30%** through Linux profiling and Python network changes; built a validated MySQL registration system supporting **50 concurrent users**.

LEADERSHIP & PROJECTS

Co-Founder & Vice President

May 2025 – June 2026

MesaFSD Full Self-Driving Club

San Diego, CA

- Directed program operations for a **25-member** autonomous-vehicle team, managing recruiting, assignments, milestones, deadlines, and Kanban tracking across software, business, mechanical, and electrical workstreams.
- Co-managed budget and sponsor relationships, securing **\$10,000**; coordinated competition readiness as the team placed **top five nationally** and became the first to complete a fully autonomous lap.

Founder & Community Lead

May 2025 – Present

Berkeley Transfers

Berkeley, CA

- Operate a transfer community serving **5,190+ Discord members** and **1,720+ Instagram followers**, coordinating volunteer moderation, technical, and content teams.
- Led a community information-architecture redesign, launched an admissions dashboard used by **700 students**, and developed resources with Berkeley transfer-support staff.

AssistAI | *Next.js, Python, PostgreSQL, OpenAI*

November 2025

- Won **1st Place Overall** at HackCC 2025 by delivering an AI-powered transfer-planning platform that unified university data, course planning, and LLM recommendations.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Swift, C/C++, Java, SQL | **Frameworks:** React, React Native, SwiftUI, Node.js, PyTorch, OpenCV

Tools: Git, Docker, Linux, Firebase, PostgreSQL, Supabase, Xcode
