Education

University of California, Berkeley — Berkeley, CA
Bachelor of Science in Electrical Engineering and Computer Sciences — *June 2028*

- GPA: 3.94 / 4.00
- Relevant Coursework: Data Structures, Algorithms, Discrete Mathematics, Computer Organization & Assembly, Linear Algebra, Multivariable Calculus, Electricity & Magnetism

Experience

Software Engineering Intern — June 2026 – Present
UniShack – Part-time — *Remote*

- Shipped a university housing search app in React Native across 11 campuses with 1,500 monthly visitors, backed by a Prisma data layer.
- Automated roommate assignment with Gale-Shapley stable matching over weighted lifestyle-preference profiles.

Semiconductor Training Fellow — July 2026 – August 2026
ChipMango – Part-time — *Remote*

- Evaluated digital-design training content for students and enterprise learners by auditing ten units of coursework, correcting errors, and producing feedback documents covering microelectrics, PCB fundamentals, transistors, and computer architecture.

Research Assistant — June 2023 – June 2026
University of California, San Diego – ACES Lab — *San Diego, CA*

- Co-filed U.S. patent (US20260010823A1) and co-authored paper on dynamic ML optimization.
- Built open-source PyTorch package for live hyperparameter tuning, saving 60s and 5.4kJ per change.
- Ran an 18-person controlled Docker study: package users fit 33 more epochs in the same 1.5-hour session.

App Developer — August 2024 – May 2026
Persian Cultural Center — *San Diego, CA*

- Launched a Swift iOS event app using SwiftData and REST APIs, driving 300+ active users and a 40% lift in sign-ups.
- Enabled in-app donation via Apple and PayPal APIs, raising over $3000 in extra donations in the first month.

Course Developer — June 2024 – May 2025
JuiceMind — *Remote*

- Authored the AP CSP curriculum in JavaScript for 1,000+ students: 30+ quizzes, 24 labs, 4 projects.
- Oversaw the Python and Web Development courses, reviewing starter code and assessments for accuracy.

Network Intern — January 2024 – May 2024
Leonardo DRS — *San Diego, CA*

- Cut peer-to-peer latency 30% on Linux by profiling bottlenecks and rewriting connection handling in Python.
- Built a registration system for 50 concurrent users with indexed MySQL queries and server-side validation.

Projects

AssistAI | *Next.js, Supabase, Python, PostgreSQL, Gemini, Vercel, OpenAI* — November 2025

- Won 1st Place Overall at HackCC 2025 with a full-stack Next.js platform for AI course planning.
- Integrated BeautifulSoup scraping and the OpenAI API for intelligent transfer advising.

Bluehax | *Python, PostgreSQL, Discord.py* — August 2025 – March 2026

- Built Discord bot in Python for Nintendo 3DS console management supporting 3,500+ global users.
- Designed a PostgreSQL job queue that dispatches repair jobs to a worker server and relays live status to users.

Leadership & Extracurriculars

Co-Founder & Vice President — May 2025 – June 2026
MesaFSD Full Self-Driving Club — *San Diego, CA*

- Placed top 5 nationally at the Autonomous Karting Series, the first team to complete a full autonomous lap.
- Oversaw Software and Business teams, securing $10,000 in sponsorship funding to build a competition self-driving go-kart.
- Led development of GPS navigation with ArduRover and computer vision pipelines with OpenCV.

Technical Skills

Languages: Python, TypeScript, JavaScript, Swift, C/C++, Java, SQL
Frameworks: React, React Native, Node.js, Express.js, SwiftUI, SwiftData
Developer Tools: Git, Docker, Linux, PostgreSQL, MySQL, Prisma, Google Cloud Platform, Vercel, Firebase, Supabase, Railway, Xcode
AI/Data: OpenAI, Anthropic, Gemini, NumPy, Pandas, Scikit Learn, OpenCV, PyTorch, TensorFlow
